

Formule Lok Air 66 / Formula Lok Air 66

Pour calculer le nombre d'onces requis pour les pneus qui ne se trouvent pas sur la liste
((La largeur du pneu en pouce) multiplié par (la hauteur du pneu gonflé en pouce)) DIVISÉ par 11.4 = La quantité d'once requise

$$\text{Formule: } \frac{\text{Largeur du pneu (en pouce)} \times \text{Hauteur du pneu gonflé (en pouce)}}{11,4} = \text{La quantité d'once requise}$$

To calculate the number of ounces required for tires not listed above

((The width of the tire in inches) multiplied by (the height of the inflated tire in inches)) DIVIDED by 11.4 = The amount of ounces required

$$\text{Formula: } \frac{\text{Tire Width (in inches)} \times \text{Inflated Tire Height (in inches)}}{11,4} = \text{The amount of ounces required}$$
